

## LHT13/190/15

LHT13/190/15 is a lightweight high tensile deer fence. This fence is designed to be used in areas of low deer pressure. It is also a very popular option as a security fence for solar farms.

High tensile fencing can be strained tighter than mild steel and therefore requires less intermediate posts. It does not stretch like mild steel and is a far stronger option. Because of the need for less posts, high tensile fencing is quicker to erect and can be a more cost effective fence than mild steel.

Line wires	13
Distance between vertical wires	15cm
Height	190cm
Top and bottom line wires	2.0mm - 1235-1390 N/mm <sup>2</sup>
Intermediate line wires	2.0mm - 1235-1390 N/mm <sup>2</sup>
Vertical wires	2.0mm - 695-850 N/mm <sup>2</sup>
Roll lengths available	100m
Weight of 100m roll	74kg
